

Congratulations on your SAFE-TEC security door – ensuring your safety since 1962!

Keep SAFE-TEC doors closed at all times. Open only in case of emergency.

In case of emergency, please perform the following steps:

- Remain calm and wait inside.
- If remaining calm is not an option, follow the activation procedure, then reset to open.

Activation procedure:

Code for doors installed on 5th floor and up: **orange - yellow - blue - green - blue - black - red.**

Code for doors installed from ground floor to 4th floor: **blue - yellow - green - orange - blue - black - red - red - green.**

- Was this door built after 1975?
- Was this door built in Lockholm?
- Does the door have 6 buttons?
- Does the door's ventilation have 12 slits?
- Does the door have a handle?
- If the majority of your answers is "yes": Please use the words.
- If the majority of your answers is "no": Please use the colors.

Reset:

How many times have you pushed the button in your reset color so far? That's your final key to open the door.

You are obliged to change your reset color every 2-3 years. Please contact customer support to do so.
