

HOUSEARREST

Task: Solve my riddle

Your little brother poses the following riddle: 'I'm standing in between two animals: one is catty, the other is all puffed up. What colour shirt am I wearing in the photo?' Look at the big photo on the wall. Find something that could be described as 'catty' and something that is 'all puffed up'. You see a child holding a blown-up balloon animal and one dressed as a cat – a reference to 'catty'. Between them is your little brother, dressed as a superhero. He is wearing a dark blue T-shirt.

Solution: DARK BLUE

Escape through the window

The tasks you have just performed gave you four different colours (in no particular order): red, yellow, black and dark blue. Now fold the climbing route precisely on the lines marked with these colours. Then position the folded strip with the black arrow exactly on top of the white arrow under the window at the front of the house. The route must not go across the downstairs window! This means there is only one possible solution.

Solution: see the picture.

Find the code

The folded climbing route is made up of 4 straight sections, each with a number of hands on it. Count the hands on each straight section: there are **4** hands between the red and yellow fold, **6** hands between the yellow and black fold, **2** hands between the black and dark-blue fold, and **4** hands between the dark-blue fold and the ground. This is the escape code!

Enter this code in the app:

4624
