## POLICE FILE

### VICTIMS

No connections can be found between the victims. Benjamin H. is a creature of habit, except when choosing his victims. He never killed two people of the same age.

### MURDERS

Benjamin H. overpowered his victims by injecting them with a narcotic. He then killed them by pumping the blood out of their bodies. He replaced the blood with formaldehyde to delay the decomposition of the body. He placed the bodies in strange poses on the edge of Druston forest, where they would be found soon by passers-by.

### GENERAL

Benjamin Horker, a.k.a. the Mortician, was born in 1957 in Druston, as the son of Harry Horker and Patricia Bramers.
